

Next-generation point of care diagnostic platform

Next-generation microfluidic technology on the LumiraDx Platform enables lab-comparable performance across a broad menu of diagnostic assays.

- Multiple tests on a single platform
- One simple, intuitive test workflow
- Small sample volumes, including capillary blood
 - Portable instrument, seamless connectivity
 - Room temperature storage of test strips

With a pipeline of 30+ assays, including hs Troponin

Next-generation point of care diagnostic platform

Lab-comparable performance

Next-generation, microfluidic technology providing lab-comparable performance

Rapid actionable results

Results in minutes guiding appropriate treatment decisions and pathways at community and POC settings, enabling improved patient flow

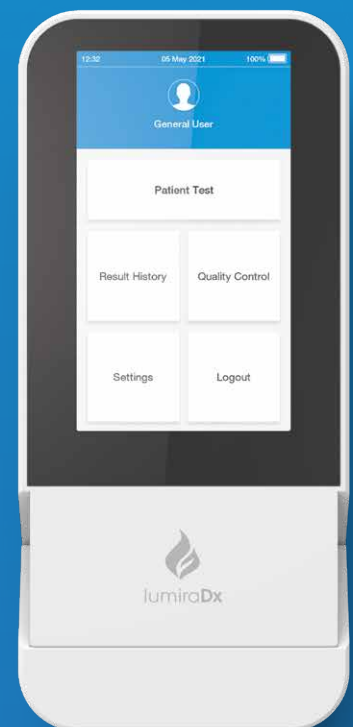

Efficiencies at the POC

Replace multiple POC systems with a single platform, increasing efficiency through reduced training, equipment, maintenance and test supplies

Broad menu - One integrated Platform

Capable of covering infectious disease, cardiovascular disease, diabetes and coagulation disorders

Multiple tests on a single platform

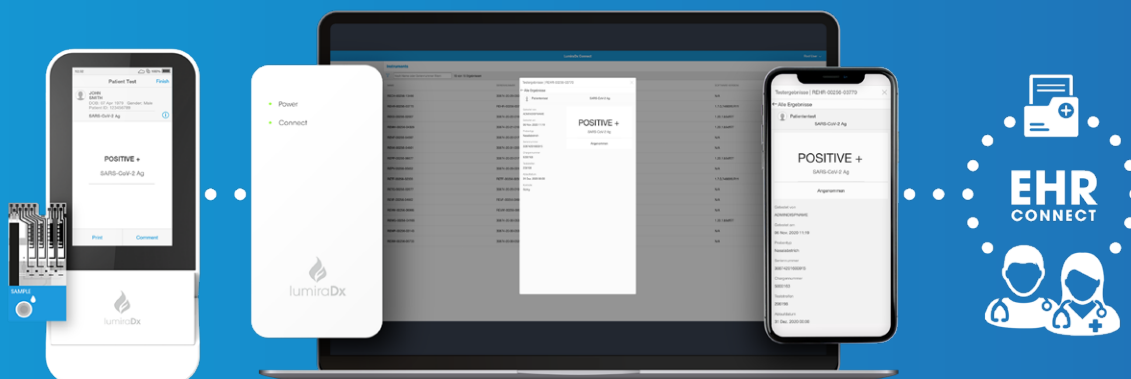

No need for multiple diagnostic instruments. With a pipeline of 30+ assays, initially focused on some of the most common conditions which require POC testing.

CRP • D-Dimer • HbA1c • INR • NT-proBNP
SARS-CoV-2 Ag • SARS-CoV-2 & Flu A/B • SARS-CoV-2 & RSV

Connected point of care diagnostics

LumiraDx Connect is the smart solution for connecting the LumiraDx Platform.

- LumiraDx Connect for use on mobile phones, tablets and PCs offers remote management of the LumiraDx Platform.
- Simple interface solutions with EHR Connect (HL7, GDT, LDT, etc.) enable secure, local transfer of test results

between the test device and clinical information systems (LIS, HIS). The results are stored in the electronic health records system, where they can be viewed by medical staff at any time and from anywhere.

LumiraDx Platform

A next-generation point of care diagnostic system, that combines a small, portable Instrument; microfluidic Test Strip; simple, standardized workflow; and seamless, secure digital connectivity to the cloud and hospital IT systems.

Contact Us! We are looking forward to your call.

We will be happy to answer your questions about reimbursement and documentation of point of care testing.
