VirClia[®] Lotus

Any test, any sample, any time

RANDOM ACCESS, CONTINUOUS LOADING

VirClia® Lotus accepts any combination of samples and reagents, regardless of the instrument status. Even while running, it remains accessible for reagent and sample addition.

STAT FUNCTION

Urgent samples can be prioritized. With VirClia® Lotus, STAT test requests are given the highest priority for processing.

TOTAL FLEXIBILITY

This true monotest solution allows the laboratory to run esoteric and low-volume infectious serology tests daily, alongside the laboratory routine. VirClia® Lotus unifies in just one CLIA system, all those parameters typically performed with ELISA, IFA or Rapid Tests.

Positive identification of samples

QR code ID of the strips

High precision single tip

POSITIVE IDENTIFICATION OF SAMPLES & STRIPS

VirClia® Lotus built-in scanner allows for full traceability of both samples and strips, avoiding clerical errors.

SAMPLE PRIMARY TUBES

Save hands-on-time using primary tubes (11-16 mm) directly in VirClia® Lotus, avoiding the inconvenience of transferring samples or performing external predilutions.

EXCELLENT TURNAROUND TIME

Results appear as soon as they are processed. The first results are available within 70 minutes and then, every 35 seconds thereafter.

The system is able to process 40 tests in 90 minutes. VirClia® Lotus holds up to 79 different monotests on-board and 50 primary sample tubes.

VIRCLIA®

THE TRUE MONOTEST

All In One

Vircell provides a complete, fully automated platform together with self-contained monotests assays with all the needed reagents in the strip including calibrators and controls.

All Are One

About 90 tests available with compatible protocols, no special workflow considerations. All different assays can be treated as one.

NO HIDDEN COSTS

- > On-demand testing, 1 monotest =1 reportable test
- > Individual quality control per monotest, no need for extra controls or calibrations
- > Shelf life associated to each individual strip; no throwing away unused components after opening!

TRUE SELF-CONTAINED MONOTEST

- All reagents are included and ready-to-use
- Every monotest includes a calibrator for internal validation
- QR code ID of the strip
- One strip= one result. Nothing else is required

MULTIPARAMETER

- Unmatched infectious diseases menu in CLIA
- Allows to run any number of different VirClia® parameters simultaneously
- Continuous loading, multi-batch testing
- STAT testing capability

CLIA, CHEMILUMINESCENT IMMUNOASSAY

- Highly sensitive detection method
- Extended linearity range
- Qualitative and quantitative tests
- Excellent turnaround time
